Crypto-to-crypto exchange API Commercial offer

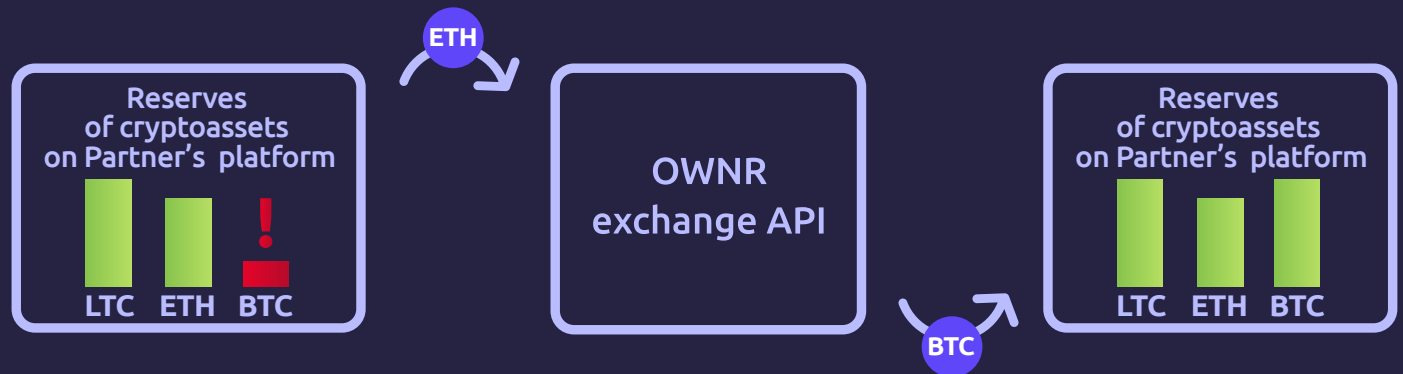

About us

OWNR ecosystem started in 2019 with a multifunctional cryptocurrency wallet and now comprises a cross-platform wallet software, payment gateway for cryptocurrency purchase, crypto-to-crypto exchange API, and prepaid Visa cards for individuals and business.

Crypto-to-crypto exchange API

OWNR offers a built-in crypto-to-crypto exchange service available on both mobile (iOS, Android) and desktop applications (Windows, Mac OS, Linux). But for the standard exchange option in the OWNR Wallet software targeted at individual users, OWNR now provides an exchange API for businesses. The key assets available for exchange are BTC, ETH, USDT, DASH, ZEC, LTC. The list is to be expanded.

How it works

Exchange API special benefits

But for the standard advantages of cryptocurrency exchange available in the wallet software, the API has some additional benefits

- markup is set on the partner's side
- unlimited volumes of supported cryptocurrencies available in an instant
- real-time monitoring of transaction statuses
- negotiable exchange rates

Who can use OWNR exchange API

- cryptocurrency exchangers can benefit from an additional (or major) liquidity channel
- cryptocurrency services can use the API to offer fast crypto-to-crypto exchange with the widget on their website

Integration cost

The cost of API integration is considered case by case in the range of 0.5% - 3%. It may be debited as a part of the fee a partner imposes on their clients within a certain period.

Crypto-to-crypto exchange API

Commercial offer

Advantages

Users can customize the network fee. Such adjustments can be made to temper sudden spikes of the blockchain network congestion, or whenever a user wants to speed up the transaction.

- Floating rate option
The exchange rate may vary during the exchange. If choose the floating rate, the amount to receive will not be fixed. Instead, it will be adjusted dynamically to the rate change.
- Fixed rate option
Exchange rate and amount to receive are fixed, but the transaction fee may vary.

Exchange >

Benefits

- Add your own fees for any transaction made on your website
- Increase the number of visitors on your website by giving them an opportunity of the instant exchange option

Built-in exchange for custodial and non-custodial wallets

Add a built-in exchange so that your users can exchange crypto in your app or on your website. Set your own fees on the exchange. Streamline your users experience by adding an instant exchange option
